

University of Reading, Institute of Education Future Learn Courses

[Supporting Successful Learning in Primary Schools](#)

Hear from education experts, school staff and pupils who provide insight into how children learn, the learning environment, and communicating in school. You'll explore the theories underlying children's behaviour that could impact learning in school, and reflect on your own experiences in the classroom to help build on your confidence and working practices.

This free to join FutureLearn online course is approximately 12 hours of learning and has been created for school support staff but will also be useful for teachers or those considering training to teach.

[Supporting Successful Learning in Secondary Schools](#)

Secondary school students often learn differently to younger students and engaging young people in the classroom can be a challenge for teachers and teaching assistants. You'll explore how to support effective learning experiences in secondary schools and reflect on your own values and biases to improve your confidence and working practice.

This free to join FutureLearn online course is approximately 12 hours of learning and has been created for school support staff but will also be useful for teachers or those considering training to teach.

[Teaching Climate and Sustainability in Primary Schools: An Outdoor Learning Approach](#)

Build your confidence teaching climate and sustainability outdoors and develop ideas to implement in your school. You'll hear from teachers about their experience of leading learning sessions outside and build a plan to embed climate awareness and sustainable practices within your own school. This free to join FutureLearn online course is approximately 6 hours of learning and has been created for teachers who want to incorporate climate and sustainability into their teaching.

[Understanding Multilingual Children's Language Development](#)

Develop your knowledge of how young children learn to understand and produce spoken language to help you support multilingual children in your classroom. You'll explore the research on multilingual language development which argues for more emphasis on using heritage languages at school and reflect on the actions you can take so the multilingual children you teach can reach their full potential.

This free to join FutureLearn online course is approximately 9 hours of learning and has been created for teachers and speech and language therapists.
