

Professional Development in Maths Education 2022/23

Mobius Maths Hub along with the NCETM (National Centre for Excellence in the Teaching of Maths) offer support and training to teachers in state funded schools. Our training provides teachers with the tools to drive change in classroom practice, develop a whole school approach to teaching maths and an understanding of the relevant pedagogy to improve student learning and results.

All our PD programmes are fully funded by the DfE.

Early Years and Primary Schools Programmes

Secondary Schools and Post 16 Programmes
